PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.88/10) with hands-on experience building and deploying full-stack web applications and AI/ML prototypes. Proficient in Java, Python, JavaScript, REST API design, and relational databases, with a solid foundation in Data Structures & Algorithms and Object-Oriented Programming. Built a complete service marketplace using Next.js, Prisma, and PostgreSQL. Seeking a Software Development Internship to contribute to production-grade products while deepening backend and DSA skills.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML5, CSS3

Frameworks & Libraries: Next.js, React.js, Tailwind CSS, Flask, Streamlit, TensorFlow, Keras

Backend & Databases: REST APIs, Prisma ORM, PostgreSQL, Neon (Serverless Postgres), Database Design

Tools & Platforms: Git, GitHub, VS Code, Prisma Studio, Render

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Web Development

EDUCATION

Bachelor of Technology in Computer Science Engineering — **July 2024 – May 2028**

Babu Banarasi Das University, Lucknow — **CGPA: 8.88 / 10.0**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence & Machine Learning

PROJECTS

Karigro – Skilled Worker Service Marketplace

github.com/theabhiworks/karigro

Tech Stack: *Next.js, React, Tailwind CSS, Prisma ORM, Neon PostgreSQL*

- Developed a full-stack platform connecting customers with skilled workers such as plumbers, electricians, AC technicians, and carpenters.
- Implemented role-based customer and worker dashboards, worker profiles, service requests, request status tracking, and notification flows.
- Designed API routes and relational data models using Prisma ORM on Neon PostgreSQL; managed schema changes through Prisma migrations.
- Debugged and resolved real-world Next.js issues including route conflicts, client/server component boundaries, API method handling, and hydration warnings.
- Built as an Open Innovation hackathon project addressing access to trusted local service providers.

Cow–Buffalo Image Classifier

Tech Stack: *Python, TensorFlow, Keras, CNN, Flask, HTML, CSS, Render*

- Trained a CNN-based image classification model on a custom cow/buffalo dataset and served predictions through a Flask web interface deployed on Render.

Plant Identifier

plant-identifier-abhishekgupta.streamlit.app

Tech Stack: *Python, Streamlit, PIL, Plant.id API*

- Built an image-based plant identification app that accepts leaf images and returns species details via the Plant.id REST API.
- Created an interactive Streamlit interface covering image upload, API processing, and result presentation.

Weather App

Tech Stack: *Python, Flask, HTML, CSS, JavaScript, OpenWeather API*

- Developed a web application that consumes real-time data from the OpenWeather API and displays location-based forecasts through a clean, responsive interface.

HACKATHONS, CERTIFICATIONS & ACTIVITIES

- **Smart India Hackathon 2025:** Participated in a 5-member team developing an AI-based wellness solution.
- **Certifications:** Python, Generative AI, and AI/ML (CognitiveClass).
- **Leadership & Community:** Member of the AI Research Center Club; active content creator on YouTube.
- **Practice:** Java DSA solutions on GitHub (java-dsa repository).
